

1/2

Fig. 1

Transition metal compound containing ligand having cyclopentadienyl skeleton

$$\begin{pmatrix}
 & R^1 \\
 & R^2 \\
 & R^3 \\
 & R^6 \\
 & R^5 \\
 & R^6
\end{pmatrix}$$
m

M: transition metal atom of Group 4 or 5 R¹: aliphatic or alicyclic hydrocarbon group

R²- R⁵: hydrogen atom, hydrocarbon group or the like

R⁶: hydrocarbon group or the like

X : halogen, hydrocarbon group or the like

n : valence of M

m:1,2

Organoaluminum oxy-compound

lonizing ionic compound

Organoaluminum compound

(Carrier)

Organic compound component

Olefin

Branched polyolefin
